

2. Megosztás és a megosztott mappa közzététele a címtárban

Hozzuk létre egy mappát („kozos2”), majd adjunk teljes jogot mindenki számára:

A címtárban hozzunk létre egy saját „szervezeti egységet” amelynek a neve „megosztások”:

Active Directory Users and Computers

New Object - Organizational Unit

Create in: GYAKORLAT.HU/

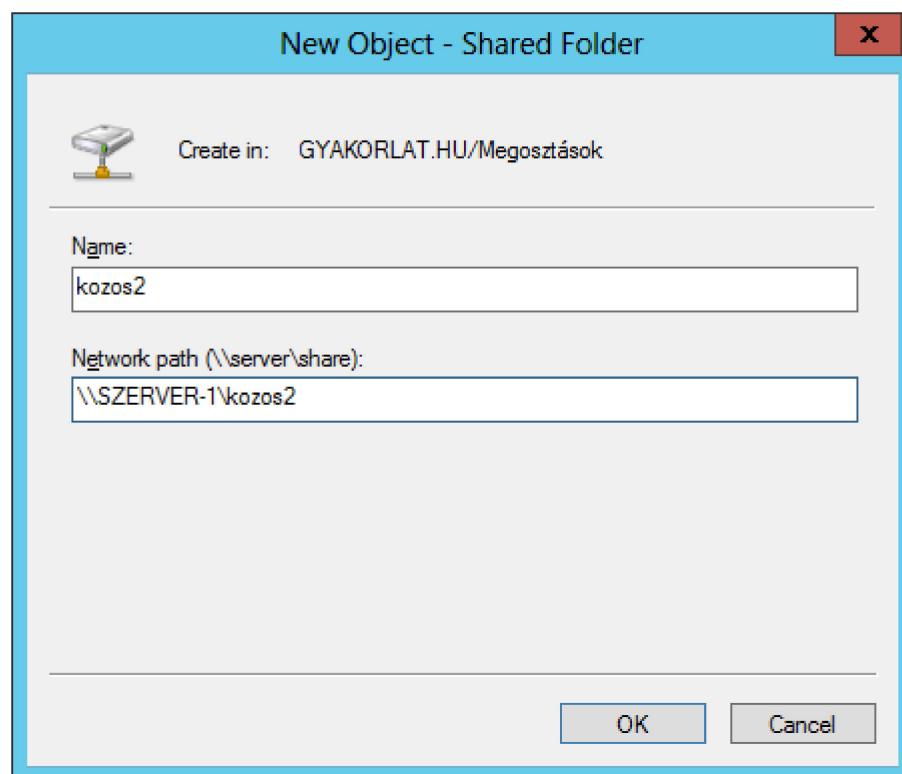

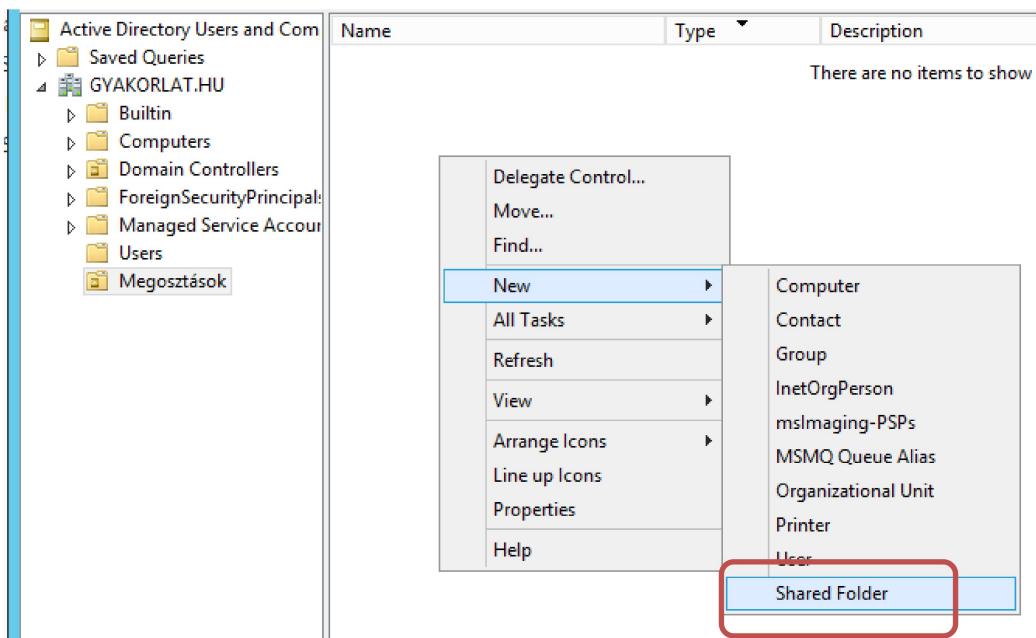

Name: Megosztások

Protect container from accidental deletion

OK Cancel Help

The screenshot shows the 'Active Directory Users and Computers' management console. On the left is a navigation tree with 'GYAKORLAT.HU' expanded, showing 'Builtin', 'Computers', 'Domain Controllers', 'ForeignSecurityPrincipal:', 'Managed Service Accou', and 'Users'. To the right is a table of existing containers. A context menu is open over the 'Users' container, with 'New' selected. A sub-menu shows various object types, and 'Organizational Unit' is highlighted. Below this, a 'New Object - Organizational Unit' dialog box is displayed, prompting for a name ('Megosztások') and checking the 'Protect container from accidental deletion' option. At the bottom of the dialog are 'OK', 'Cancel', and 'Help' buttons.

Ebbe a szervezeti egységebe tegyük bele a megosztásomat:

A szervezeti egységben megjelent a megosztott mappa:

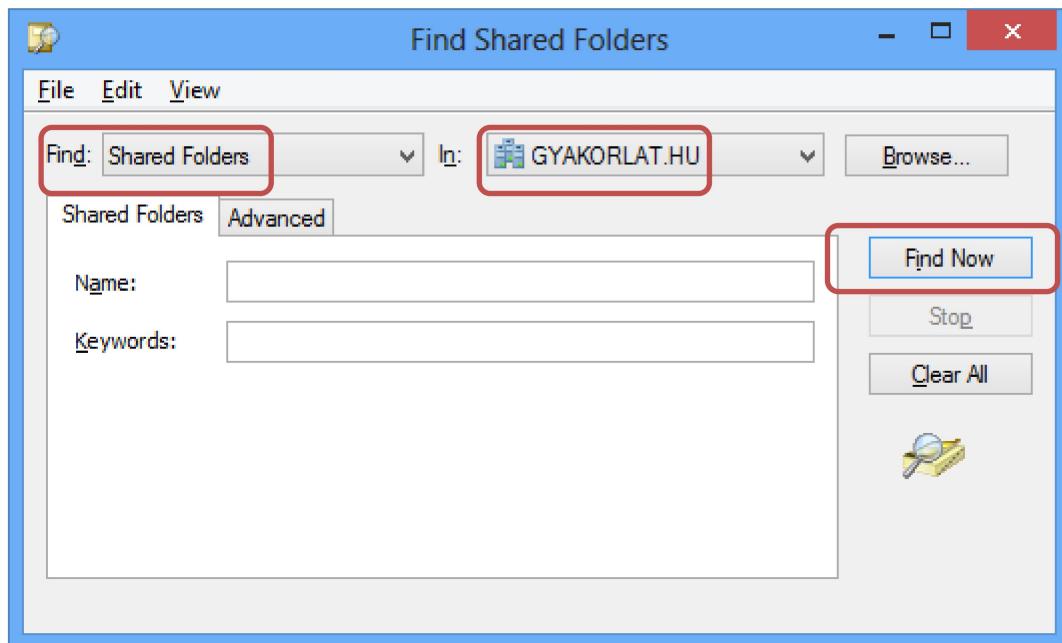

The screenshot shows the Windows Active Directory Users and Computers (ADUC) application window titled "Active Directory Use". The left pane displays a tree view of the domain structure, including "Active Directory Users and Com...", "Saved Queries", and "GYAKORLAT.HU" which is expanded to show "Builtin", "Computers", "Domain Controllers", "ForeignSecurityPrincipal:", "Managed Service Account", and "Users". A folder named "Megosztások" is selected and highlighted with a red box. The right pane is a table with columns "Name" and "Type". It contains one entry: "kozos2" of type "Shared Folder". This entry is also highlighted with a red box.

A megosztás tesztelése a Kliens gépen

A fájlkezelőben a „Hálózatok”-nál a „Keresés a címtárban” segítségével a címtárban publikált megosztásokat tudom megkeresni:

The screenshot shows the Windows File Explorer interface with the title bar "Network". The top navigation bar has tabs "File", "Network", and "View", with "Network" currently selected. Below the tabs are several icons: Properties, Open, Connect with Remote Desktop Connection, View printers, View device webpage, Add device and printer, Search Active Directory (which is highlighted with a red box), and Network and Sharing Center. The main pane shows a "Location" section with "Downloads" and "Recent places", and a "Network" section listing "Libraries", "Documents", "Music", "Pictures", "Videos", "Computer", and "Network" (which is highlighted with a red box).

A címtárban való kereséshez állítsuk be, hogy megosztott mappát keresünk, és a saját tartományunkban:

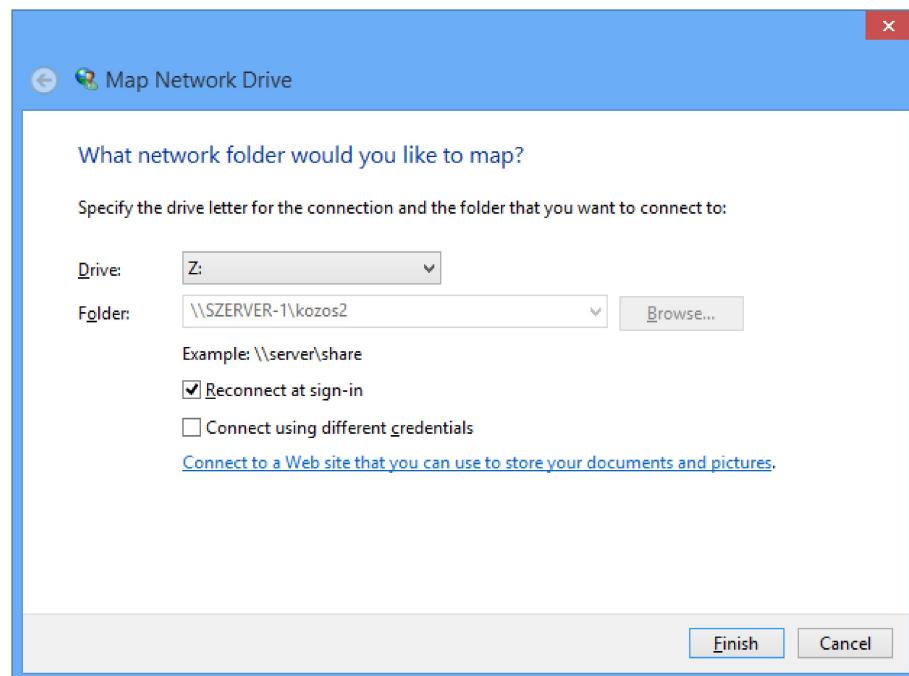

A keresés eredménye, hogy amit publikáltunk a címtárban, az megjelent:

This screenshot shows the same 'Find Shared Folders' application after a search. The 'Find Now' button was clicked, and the results are displayed in a table titled 'Search results:'. The table has columns: 'Name', 'Share Name', and 'Keywords'. One row is visible, showing 'kozos2' in the 'Name' column and '\\SZERVER-1\kozos2' in the 'Share Name' column. A context menu is open over this row, listing options: 'Explore', 'Find...', 'Map Network Drive...', and 'Properties'. The 'Map Network Drive...' option is highlighted with a blue selection bar.

Name	Share Name	Keywords
kozos2	\\SZERVER-1\kozos2	

Ezt a mappát fel tudjuk csatolni a rendszerünkbe:

A fájlkezelőben megjelent az újabb hálózati mappa:
